-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 13 December 2000.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 1771

**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 and 2, drawn to a flocked transfer, classified in class 428\*\*, subclass 90+.
  - II. Claims 3-15, drawn to method of making the flocked transfer, classified in class 156, in various subclasses.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case as shown by Applicant there is more than one way of making the flock transfer, as shown Applicant could for simultaneously coextrude the flocked surface, adhesive and release layer and then laminated it to the hot melt film and subsequent substrate.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. During a telephone conversation with Ms. Molly Beth Kocialski on 05/20/02 a provisional election was made without traverse to prosecute the invention of Group I, claims 1 and 2. Affirmation of this election must be made by applicant in replying to this Office action. Claims 3-15 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

***Claim Rejections - 35 USC § 112***

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 2 recites the limitation "thermoplastic film" in line 1. There is insufficient antecedent basis for this limitation in the claim. Claim 2 depends from claim 1, which simply recites a thermoplastic hot melt sheet. Applicant is suggested to either amend claim 1 to state film or amend claim 2 to state sheet.

***Allowable Subject Matter***

7. Claims 1 is allowed.
8. Claim 2 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
9. The following is a statement of reasons for the indication of allowable subject matter: Other than the 112 issues in this application, there was no prior art found that teaches or fairly suggests a flocked transfer consisting essentially of a release sheet, a release agent and flock adhered to the release agent forming a transfer, said transfer is adhered to a substrate by a thermoplastic hot melt film.

Abrams (USPN 6,010,764) is believed to be the closest prior art. Abrams teaches a transfer comprising a flocking and a noncompatible appliqué however he uses a powdered hot melt adhesive to adhere the transfer to the desired substrate. Abrams discloses the basic structure but fails to disclose the novel feature or improvement over the prior art in that Applicant employs a thermoplastic hot melt film.
